Faqous, Sharqia, Egypt

PROFESSIONAL SUMMARY

Senior Unity Game Developer with 5+ years of experience delivering mobile, multiplayer, WebGL, PC, and XR games using Unity and C#. Proven track record in gameplay systems, modular architecture, mobile UI/UX, networking, performance optimization, and end-to-end production delivery. Currently leading Unity development and technical workflows for a 10-member team, combining hands-on C# engineering with Agile sprint planning, stakeholder reporting, and cross-discipline coordination.

CORE SKILLS

Unity & Engine: Unity 2D/3D, C#, XR Interaction Toolkit, ShaderGraph, Unity Addressables, ScriptableObjects, Assembly Definitions

Gameplay & Systems: Gameplay programming, physics, collision, animation systems, UI/UX, audio, localization, monetization, rule-based AI bots, NavMesh AI, player experience optimization

Mobile & Platforms: Android, iOS, WebGL, PC, Meta Quest (VR/AR), cross-platform deployment, responsive UI, device performance tuning

Networking & Backend: Photon PUN 2, Photon Realtime, Photon Fusion, PlayFab, Firebase Realtime Database, Socket.IO, REST APIs, UnityWebRequest, Postman

Architecture & Code: Modular Unity architecture, SOLID principles, dependency injection, design patterns, clean code, maintainable systems

Optimization & QA: Unity Profiler, memory optimization, frame-rate optimization, asset optimization, loading optimization, custom debug utilities

Leadership & Tools: Agile/Scrum, sprint planning, stakeholder reporting, Git, GitHub, GitLab, Plastic SCM, Perforce, ClickUp, Notion, Trello, Jira

PROFESSIONAL EXPERIENCE

Lead Unity Developer / Technical Lead · **RAR IT** · Remote · Dec 2025 – Present

Promoted from Senior Unity Developer, Nov 2025

- Lead Unity production for a historical mobile game targeting Android and iOS, balancing hands-on C# development, technical direction, Agile sprint execution, and producer-level coordination.
- Scaled and stabilized the production team from 5 to 10 members across Unity development, art, level design, game design, narrative, and technical art.
- Designed a complete Agile production workflow covering 2-week sprints, task review, dependency tracking, blocker reporting, GitHub ownership, art pipeline, asset-import standards, and live project-status documentation.
- Led integration of a large city level featuring 50+ 3D models, coordinating asset quality, performance constraints, and cross-discipline delivery.
- Delivered a full UI/UX rebuild across 15+ screens, improving clarity, consistency, and mobile player experience.
- Directed refactoring of 8+ legacy systems into modular Unity architecture using assembly definitions, clean code principles, and appropriate design patterns.
- Improved frame rate from ~30 FPS to 60+ FPS and reduced startup/load time by ~15% through animation, asset, and loading optimization.
- Supervised 7+ game design documents and 3+ new dialogue sequences, translating production goals into clear implementation tasks.
- Audited and optimized 20+ legacy art assets, improving performance, visual consistency, and production quality.

Unity XR Developer · **Arabtesting Company** · Cairo, Egypt (On-site) · Oct 2025 – Nov 2025

- Developed and optimized Unity VR experiences for therapeutic, educational, and behavioral-improvement goals on Meta Quest devices.

- Built gameplay systems, project structure, debugging workflows, and performance tuning for VR projects from the ground up.
- Applied OOP principles, modular structure, XR Interaction Toolkit, Addressables, Photon Networking, and Plastic SCM to improve maintainability, stability, and team collaboration.

Freelance Unity Game Developer · **Self-employed** · Remote · Apr 2025 – Aug 2025

- Implemented advanced rule-based AI bots and custom card-game logic for offline support, gameplay variations, and competitive player experiences.
- Developed Socket.IO-based multiplayer systems, tested REST/HTTP APIs with Postman, and integrated backend communication via UnityWebRequest.
- Integrated authentication, ads (AdMob), IAP, localization, and debugging tools across Android, iOS-ready, WebGL, and PC builds.

Co-founder / Unity Game Developer · **Lessonara Company** · Alexandria, Egypt (Remote) · Jun 2022 – Apr 2025

Previously Unity Game Developer – Freelance Contract, Jan 2022 – Jun 2022

- Co-developed an educational multiplayer battle royale game, contributing gameplay programming, architecture design, performance optimization, UI, localization, and production delivery.
- Designed scalable modular architecture using reusable assemblies, clean design patterns, and maintainable Unity systems suited for a growing team.
- Improved load times by ~60% and reduced build size by ~20% through profiling, scene optimization, asset cleanup, and build-pipeline improvements.
- Built NavMesh-based AI systems and implemented anti-cheat logic for secure competitive gameplay and reliable multiplayer sessions.
- Integrated WebView for external educational platform connectivity and AWS backend APIs for production features.
- Delivered cross-platform builds with responsive UI, localization support, and QA tools using Unity Profiler and custom test utilities.

Freelance Unity Game Developer · **Self-employed** · Remote · Jul 2020 – Jan 2022

- Delivered Unity game projects for freelance clients including real-time multiplayer card games, Ludo, board-style games, bidding games, and 2D titles.
- Built an online multiplayer card game using Photon PUN 2 and PlayFab, covering UI/UX, gameplay core, backend integration, and client delivery in approximately 3 months.
- Implemented advanced rule-based AI bots and custom card-game logic for offline support, gameplay variations, and competitive player experiences.
- Integrated authentication, ads (AdMob), IAP, localization, and debugging tools across Android, iOS-ready, WebGL, and PC builds.

SELECTED PROJECT EXPERIENCE

- Historical Mobile Game (Android/iOS): Technical lead role covering team leadership, city level integration (50+ assets), UI/UX redesign (15+ screens), game design documentation, legacy system refactoring, and frame rate improvement (30 to 60+ FPS).
- Educational Multiplayer Battle Royale: Student-focused multiplayer game with modular architecture, NavMesh AI, anti-cheat logic, WebView platform integration, AWS backend APIs, localization, and 60% load-time reduction.
- Online Multiplayer Card Game: Photon PUN 2 + PlayFab real-time game with custom card logic, rule-based AI bots, UI/UX, and full backend integration, delivered in approximately 3 months.
- VR / XR Experiences: Meta Quest therapeutic and educational experiences built with XR Interaction Toolkit, Addressables, and Photon Networking.

EDUCATION

Bachelor's Degree in Computer Science

Faculty of Science, Al-Azhar University, Nasr City · 2020 – 2025 · Grade: Very Good

PROFESSIONAL DEVELOPMENT

- Completed CS50; structured self-directed training in design patterns, software architecture, networking, mobile optimization, game production, and real-time development workflows via Unity Learn and Unity Documentation.
- Google Project Management training; applied Agile/Scrum principles to sprint planning, documentation, risk tracking, and stakeholder reporting.
