Professional Summary

Senior Unity Developer with 6+ years of professional experience building, maintaining, and optimizing production applications across mobile, multiplayer, XR, PC, and WebGL. Strong expertise in C#, gameplay and systems programming, real-time networking, modular architecture, debugging, and performance optimization. Experienced in taking complex features from design and architecture through implementation, profiling, testing, and production delivery. Delivered measurable improvements across multiple products, including major gains in frame rate, loading time, build size, and runtime stability. Comfortable working across both new systems and large existing codebases while keeping solutions scalable, maintainable, and production-ready.

Technical Skills

Unity & C#: Unity 2D/3D, C#, ScriptableObjects, Assembly Definitions, Addressables, XR Interaction Toolkit

Gameplay & Systems: Gameplay Programming, Physics, Collision, Animation Systems, UI/UX Implementation, Audio Integration, Combat Systems, Inventory Systems, Equipment Systems, Localization

Multiplayer & Networking: Photon PUN 2 / Realtime, PlayFab, Socket.IO, Real-Time Multiplayer Systems, Multiplayer Synchronization, Session Recovery, Reconnection & Rejoin Systems, HTTP and REST API Integration

AI & Gameplay Logic: Rule-Based AI Bots, NavMesh AI, Gameplay Decision Logic, Anti-Cheat Validation

Software Architecture: OOP, SOLID Principles, Dependency Injection, Design Patterns, Modular Architecture, Clean Code, Refactoring

Performance & Optimization: Unity Profiler, CPU/GPU/Memory Analysis, Frame-Rate Optimization, Loading Optimization, Asset Optimization, Build-Size Optimization, Mobile Optimization, XR/VR Optimization

Platforms: Android, iOS-Ready Development, WebGL, PC, Meta Quest XR

Tools & Version Control: Git, GitHub/GitLab, Plastic SCM, Perforce, Visual Studio, ClickUp, Jira

Professional Experience

RAR IT LLC | Remote | Nov 2025 - Jun 2026

Lead Unity Developer / Technical Lead | Dec 2025 - Jun 2026

Senior Unity Developer | Nov 2025 - Dec 2025

- Led hands-on delivery of a production Unity mobile title, owning C# implementation across gameplay systems, architecture, performance, and debugging.
- Raised frame rate from approximately 30 to 60+ FPS and reduced startup and loading time by about 15% through profiling-led asset, animation, and loading optimization.
- Led the refactoring of more than eight legacy systems into modular assemblies using SOLID principles, clearer dependency boundaries, and maintainable C#.
- Rebuilt more than 15 UI/UX screens and coordinated large 3D environments and multiple playable levels across disciplines.
- Expanded and stabilized a multidisciplinary team from 5 to 11 members across engineering, art, game design, level design, and narrative.
- Established two-week sprints with task estimation and review, dependency and blocker tracking, and structured biweekly stakeholder reporting.
- Built an internal WinForms tool that consolidated manager and peer reviews with performance metrics to generate employee reports.

Arabtesting Company | Cairo, Egypt | Oct 2025 - Nov 2025

Unity XR Developer | On-site

- Optimized Meta Quest VR experiences from approximately 20 to 60-75 FPS by resolving CPU, GPU, memory, and content bottlenecks.
- Built gameplay systems, project structure, and debugging workflows from the ground up using C#, XR Interaction Toolkit, Addressables, Photon Networking, and Plastic SCM.
- Applied OOP and modular design to improve maintainability, iteration speed, and team collaboration across XR work.

Lessonara Company | Remote | Jan 2022 - Apr 2025

Co-founder / Unity Game Developer | Jun 2023 - Apr 2025

Freelance Unity Game Developer | Jan 2022 - Jun 2023

- Co-founded and helped lead production of a real-time multiplayer Unity product, with responsibility for architecture, performance, gameplay systems, and delivery.
- Reduced cold-start loading from 24-26 seconds to 4-6 seconds and lowered build size by about 20% through profiling, scene and asset optimization, and staged loading.
- Reorganized the codebase into independent Assembly Definition modules - PlayerCore, Sync, Network, Localization, UIView, and WebView - to reduce coupling and improve maintainability.
- Developed and maintained real-time gameplay and synchronization flows using Photon within a modular multiplayer architecture.
- Built core gameplay systems including combat, equipment, inventory, store flows, NavMesh AI, and anti-cheat validation.
- Integrated WebView communication and AWS backend APIs and supported localized, cross-platform delivery with profiler and custom QA/debugging tools.

Dewania | Remote | Mar 2024 - Apr 2024

Contract Unity Developer

- Delivered Unity WebGL work with real-time Socket.IO communication and HTTP API integration while respecting client confidentiality.
- Implemented rule-based AI bots and competitive offline gameplay logic for card-game systems.

Self-Employed | Remote | Jul 2020 - Jan 2022

Freelance Unity Game Developer

Public titles: King of Games, Tawltna

- Built real-time multiplayer card and board game systems using Photon and PlayFab.
- Implemented session recovery with automatic reconnection and rejoin-last-room flows, plus responsive UI that prevented overlap across screen sizes.
- Developed rule-based AI bots and offline game logic for multiple competitive game variants.
- Integrated authentication, AdMob, in-app purchases, and localization across multi-platform Unity builds.

Education

Bachelor of Science in Mathematics - Pure Mathematics and Computer Science Track

Faculty of Science, Al-Azhar University, Nasr City, Cairo | 2020 - 2025

Overall Score: 80.76% | Grade: Very Good

Learning & Development

Advanced Multiplayer Engineering: Photon Fusion, Server-Authoritative Multiplayer Architecture, Multiplayer Netcode Programming

Advanced Unity Performance: Advanced Profiling Techniques, Platform-Specific Optimization, Runtime Performance Analysis

Backend for Multiplayer Games: ASP.NET Core Web API and backend architecture for connected applications

Languages

Arabic: Native | English: Upper-Intermediate (B2)
